I am seeking for the challenging roles in Cybersecurity sector.
From an early age, I have demonstrated a fascination with the ethics, aims and values of organisations in addition to informational systems. In my studies, I have made it a key objective to better understand the requirement of the Organization and deliver my best accordingly.
In my undertaking of these pursuits, I have developed a considerable interest in the 'why' and 'how' as managers, that we may gain a better sense of the informational process. I believe my previous experience would suit me well to this role.

Employment History

Compliance and Risk Cyber Security Officer
March 2019 – Present, Ministry of Economy and Planning, MEP Saudi, Riyadh, Saudi Arabia.
